KAMLESH KANDPAL
Frontend Developer (React / Next.js)
kkandpal06@gmail.com | +91 9718987066 | linkedin.com/in/kamlesh-kandpal | github.com/KamleshKandpal1

SUMMARY

Frontend Developer with nearly 2 years of hands-on experience building and maintaining React and Next.js applications, from internal admin dashboards to customer-facing websites. I currently work on the SchoolAura ERP, used by 100+ schools, where I work on improving existing features, fixing issues, and keeping the application fast and reliable. I also have experience deploying mobile apps to both the Google Play Store and Apple App Store.

EXPERIENCE

React Frontend Developer | InSoftLink Software | Delhi (On-site) | Oct 2025 - Present

- Built the admin panel and live dashboards for SchoolAura ERP, a school management platform used by 100+ schools for daily operations like fees, attendance and reports.
- Refactored legacy React components to modern patterns, cutting unnecessary re-renders and page load time by 20%.
- Built 10+ reusable components that the team now uses across 15-20 screens, so new features ship faster.
- Deploy and maintain the live web app (erp.schoolaura.com) and two Android apps on Google Play (Erp SchoolAura, SchoolAura).

MERN / Next.js Developer Intern | Eddy Tools | Remote | Dec 2024 - Feb 2025

- Built REST APIs in Express.js with Prisma/Mongoose, and added login with NextAuth.js and JWT.
- Managed state with Context and Redux, and used React Query/SWR to cut redundant data fetching.
- Sped up pages with lazy loading, caching and bundle splitting, then deployed to Vercel/AWS with SEO basics.

React Developer Intern | Sum India | Hotbot Studio | Delhi (Hybrid) | Jun 2024 - Nov 2024

- Led the first build of the Sum India and Hotbot Studios websites, turning designs into responsive, working pages.
- Shipped Sharma Blades, a live e-commerce site with product listings, search and category pages, still running in production.

SKILLS
Frontend: React, Next.js, JavaScript (ES6+), Tailwind CSS, Bootstrap, HTML, CSS
State & Data: React Context, Redux, React Query / SWR, REST API integration
Backend: Node.js, Express.js, JWT authentication
Databases: MongoDB, MySQL, PostgreSQL
Tools: Git, GitHub, VS Code, Vercel, AWS (basic)

PROJECTS

Med-Point: Doctor's Appointment System | React, Node.js, Express, MongoDB, JWT | Dec 2024 - Jan 2025
- Full booking platform with separate patient, doctor and admin panels, covering scheduling, status updates and doctor management.
- GitHub: github.com/KamleshKandpal1/Med-Point_Appointment

Task Manager (full stack) | React, Node.js, Express, MongoDB, Tailwind | Sept - Nov 2024
- Full-stack app with JWT auth, protected routes and a REST API, built with a separate frontend and backend.
- GitHub: github.com/KamleshKandpal1/Task-Mang-Frontend

Sharma Blades | React, Tailwind, React-PageFlip, React-PDF | sharmablades.in
- Live e-commerce site for a kitchen blade brand with product listings, custom search and a flip-book style catalog.

EDUCATION
B.Tech, Computer Science | J.B. Knowledge Park (MDU), Haryana | 2019 - 2023

CERTIFICATIONS
The Complete JavaScript Course 2024 (Udemy) | 30 Days of React (Codedamn)
